

RED HOT EFFICIENCY

At the World of Saws you will see a wide range of applications, strategy and fascinating sawing technology.

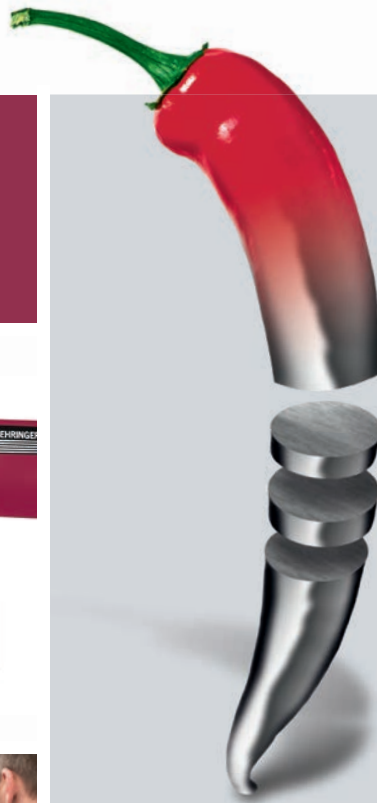

Directions:

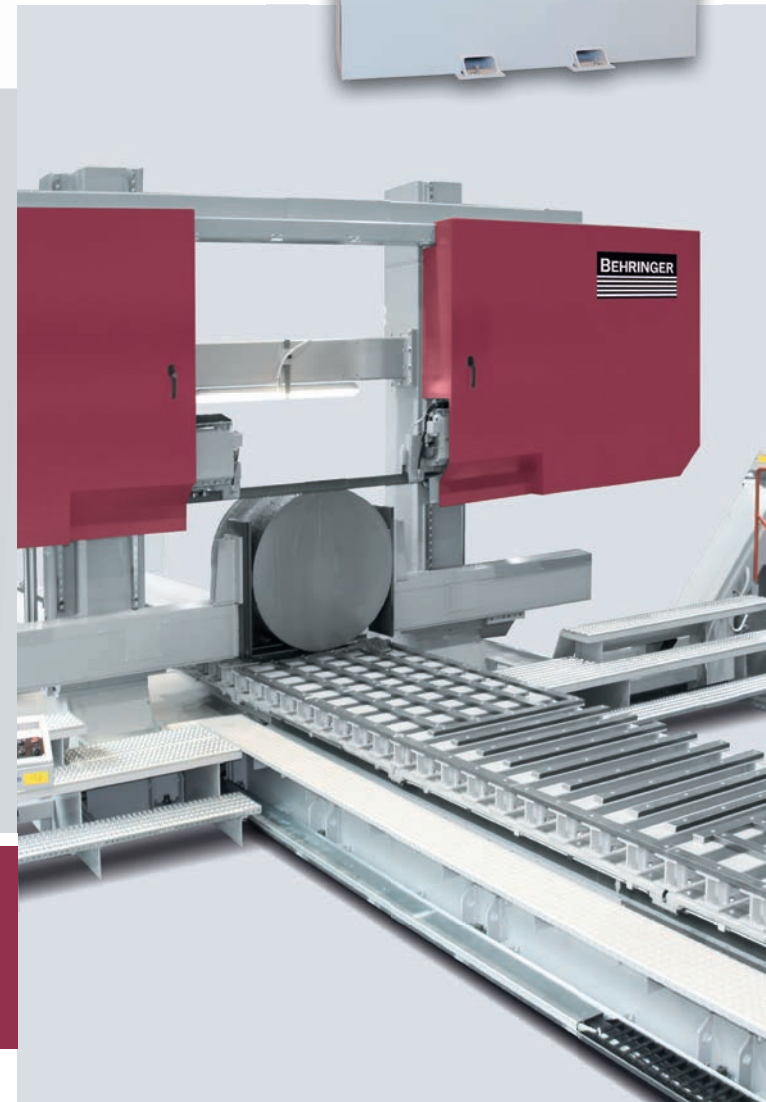

Traveling west from Stuttgart, use the motorways A81 and A6, exit the A6 at the Bad Rappenau/Kirchardt exit and then follow signs to Kirchardt (B39). At the traffic circle before Kirchardt take the second exit into the Daimlerstraße. After about 200 meters turn left into the Industriestraße. After approx. 100 meters you will see our building on the left.

Traveling east from Mannheim, use the motorway A6, exit the A6 at Sinsheim-Steinsfurt/Kirchardt (B39). Once in the town, stay on the main road and follow signs to Kirchardt (B39). Just after you drive out of town, take the first exit in the traffic circle into the Daimlerstraße. After about 200 meters turn left into Industriestraße. After approx. 100 meters you will see our building on the left.

BEHRINGER

Experience Results!

Improvements in efficiencies are reflected in results. For your customer. For you. For us.

Therefore, we are constantly working to support you with our wide range of high performance band and circular saws for the steel and metal processing industry in the most beneficial way. Immerse yourself in the "World of Saws". Discover innovative equipment and solutions for high precision and greater efficiency in your process.

Be inspired by our technical presentations. Take advantage of the dialogue for first-hand expertise and discover how to become more efficient.

We look forward to your visit.

Main Topics

HBE Miter Bandsaws

High cutting performance, simple operation, precise miter cuts and more make for an exceptionally low cost-per-cut ratio. Experience our new generation of miter bandsaws close up by being with us live for the presentation of the new HBE automatic miter bandsaws.

Automated system solutions by the PARTNERS 4 STEEL

Turn-key lines for fabricators and steel distributors in any combination of sawing, drilling, shotblasting and protecting from a single source. Our partners Vernet-Behringer and Rosler await you!

High-performance sawing of steel, high alloy materials and aluminium

See a wide variety of band and circular sawing machines for OEM and steel distribution applications. In addition, we will focus on "Smart Manufacturing" in a practical way and give you a taste of the possibilities for your production of tomorrow.

Sawing of large dimensions

We show solutions for cutting slabs and large format plates. Both for the manually controlled single cut as well as fully automatic approaches for a low-manpower operation.

Agenda / Technical Lectures

9:30 a.m.

Opening

11:00 – 12:00 a.m.

Sawing Technology meets Intralogistics

Modern steel distribution increasingly relies on interconnected production systems.

Lunch break

2:00 – 3:00 p.m.

Cutting of Special Materials

Application solutions for efficient sawing of non-ferrous and high-tensile materials for mechanical engineering, the automotive and aerospace industry.

Take the opportunity: Our Foundry - tour

Experience state of the art casting technology - close up. During the three-day event we will offer continuous tours through our new, state of the art foundry. Technology that will impress you.

Evening Events

Please note your participation for one of our evening events. Take the time to exchange ideas in a friendly atmosphere with our employees and other visitors.

Tuesday, June 20th at 06:30 p.m.

BEHRINGER ROCKS

Celebrate with us! Classic Rock and Pop express yourself in the evening. Enjoy hot rhythms, cool drinks and a delicious buffet.

Wednesday, June 21st at 06:30 p.m.

BEHRINGER SWAYING

... on our Summer Festival. For those who like it traditional, this evening is based on southern German specialties and fresh draft beer – in our beer garden with traditional brass band music.
